EXPERIENCE

LEIDOS *Feb '13-Present*

Integration Engineer, Project Manager

Falls Church, VA

MEDCOI Network Migration and Datacenter Consolidation

- Developed strategy to most efficiently move patient data from source to destination site by utilizing deduplicated and encrypted data backup methodology.
- Adapted chunk rates of deduplication stream to account for legacy OpenVMS disk partitioning, minimizing data, transfer footprint while maintaining integrity.
- Provided SME Consulting of Commvault software for Program Management Office.

LCS CHCS Virtualization Project

- Led in integrating Commvault with AHLTA's backend components, Oracle and VMware.
- Designed process for centralized control of enterprise wide backups which meet the FIPS encryption requirements.
- Coordinated process changes across various levels of leadership and teams spanning over 100 military treatment facilities.
- Led in patient data restoration activities where required in facilities such as Walter Reed Medical center.

AHLTA Integration

- AHLTA integration activities include the standardization of engineering practices to facilitate software baseline tracking and integration testing.
- Coordination of infrastructure requirements and implementation for over 25 external vendors and product teams.
- Facilitation of Configuration Management control processes to ensure software baselines are captured and requirements met. Including controls for STIG and IAVA changes as defined by current Defense Information System Agency (DISA) security postures.

KSJ *Nov '11-Jan '13*

Project Manager

Falls Church, VA

- Served as project manager and senior level technical liaison for the deployment of new assets at the DISA production datacenter.
- Gathered requirements of software vendors to coordinate the implementation of server architecture in production DISA facilities.
- Developed a customized dashboard reporting tools designed to account for the process of deploying new assets calculating the expected process times and documenting required inputs.

SAIC *June '10-Oct '11*

Project Manager

Falls Church, VA

DHIMS EHR University Conference

- Provided direct support to the Government Contracting Officer Representative (COR) responsible for the AHLTA Products and Services training contract.
- Supervised all phases of IT asset deployment for the EHR University Conference including logistical, security and personnel support.
- Utilized virtualization technologies to achieve widespread deployments of training systems for students.
- Designed and managed the procurement of a Smart In-Patient examination room for training purposes and the implementation of a Medical Smart Office for training purposes which included a 3d rendered concept drawing.

EDUCATION

- Amazon Web Services Solutions Architect Certification
- PMP® Certified Member #1535946 and fulfilling the continual education requirements, including ITILv3 certification.
- Bachelors of Arts in Business Administration with an emphasis in computer science - Transylvania University 2001-2005
- Currently pursuing Master of Science in Information Technology: Systems Engineering at University of Maryland
