Career Objective

Experienced, results-driven leader looking for an opportunity to leverage my background of six and a half years of professional experience developing and leading complex teams, mitigating risk, and delivering results. Holds a Masters of Business Administration from University of Mary, and a Bachelor of Science from the United States Military Academy. Available 26 March 2018.

Professional Experience

U.S. Army Officer | Senior Logistics Manager

April 2015 – December 2015

United States Army, Fort Riley, Kansas

Managed and integrated several different levels of organizational management and logistic support to provide successful Sustainment operations across six customer units totaling over 500 personnel and 25,000 pieces of equipment.

- Served as the project lead, directly managing a 15 person team. Conducted quarterly performance counselings and appraisals.
- Managed the inactivation of six customer units, transporting over 25,000 pieces of equipment across various military installations around the globe. Resulted in the first Military unit to successfully inactivate on time and within budget.
- Provided intricate knowledge of the capabilities within Enterprise Business System and Customer Relationship Management applications.
- Provided specialized analysis, metric reviews, and recommendations on a variety of logistics systems through the collection of narrative and statistical material. Resulted in a new written standard for deactivation of a Military unit.

U.S. Army Officer | Senior Project Manager

September 2013 – April 2015

United States Army, Fort Riley, Kansas

Led, trained, and professionally developed a team of eight senior employees. Established and operated the Battalion operations center, responsible for providing guidance and oversight of four 150 person companies. Led planning meetings to establish a defined mission statement, goals, and objectives. Managed the project and team schedules to ensure work was completed with the project timeline. Led the project team in identifying risks and developing contingencies for each project. Conducted in-process reviews in order to evaluate task completion and timeline accountability.

- Supervised five separate foreign military projects resulting in the training and developing of over 200 African officers. Refined programs of instruction, teaching methods and materials. Liaised with U.S. embassies to provide risk mitigation for security concerns and language support in country.
- Planned and led a large scale 15 day training event that involved live fire exercises and multiple unit coordination that resulted in the proficiency training of over 400 Soldiers with zero incidents.
- Planned and led project for a large-scale movement of military equipment on public highways. Supervised liaison with Department of Transportation for highway clearances and implements risk mitigation for movement of 112 vehicles and trailers over 120 miles of public highways.

U.S. Army Officer | Assistant Project Manager and Planner

April 2012 – September 2013

United States Army, Fort Polk, Louisiana

Coordinated, synchronized, reported, and monitored the fleet inventory and maintenance of 26 fuel tankers valued at over \$6 million dollars, a Supply Service Warehouse that maintained 2050 categories of equipment valued at \$2.2 million dollars and food service operations for over 3,500 personnel for all military operations.

- Led weekly meetings with key leadership dramatically improving the resource management for over 3,500 personnel and equipment and enforcing strict procurement procedures.
- Ensured operational excellence while overseeing the daily transactions of a Supply Service Activity Warehouse by developing standardized work practices and conducting quarterly work performance evaluations for ten employees.

-
- Prepared key performance metrics for quantitatively tracking requisitioned items and inventory saving the Army millions of dollars by preventing fraud, waste, and/or abuse.

U.S. Army Officer | Executive Manager

May 2009 – April 2012

United States Army, Fort Polk, Louisiana

Second-in-command of 128-person company. Led 7-person team resourcing training and executing logistical support for 5 customer units. Responsible for inventory and maintenance of a fleet of 120 military vehicles and \$13-million of assets.

- Led team to repair and restore 700 pieces of support equipment, 150 weapons, and 260 pieces of communication equipment after deployment to Afghanistan; ensured company's full readiness for follow-on training and deployment.
- Planned logistics and executed support for over 60 training events for 5 customer units totaling over 700 personnel trained; ensured effective support for weapons/drivers' qualifications and field exercises.
- Led 45-person team in Afghanistan for 9 months executing combat logistics patrols to provide battlefield distribution of supplies, petroleum, ammunition, and repair parts for over 700-person battalion. Planned and resourced missions. Managed accountability, maintenance, and employment of over \$15-million of equipment.
- Led team executing over 200 combat female engagement patrols; resulting in the rebuilding of three girls schools, the completion of two female conference centers, and multiple education seminars. Successfully supported over 1,500 Department of the Army civilians, contractors and Soldiers; earned Bronze Star.
