Tuthill Corporation Opens Lenexa, Kansas Manufacturing Site for Fill-Rite® Fuel Transfer Pumps

BURR RIDGE, IL — Tuthill Corporation has announced the opening of a new manufacturing site for Fill-Rite pumps and products located in the Kansas City metropolitan area. Tuthill will continue to manufacture and support products in its Fort Wayne, Indiana facility as well. The Fort Wayne location will provide Engineering, Customer Service, Product Management and Sales & Marketing efforts for all Fill-Rite products.

Expansion with the Lenexa, Kansas site will support Tuthill's business and commercial model to better serve customers as the demand through sales channels and e-marketplaces continues to grow. The Lenexa site will serve shipments in support of shorter lead times and market share growth. Tuthill's overall business continues to expand throughout North America, Latin America and Europe due to investment in product performance and delivery.

The new facility has brought both professional and manufacturing jobs to the Lenexa community in 2020. "I'm thrilled to introduce the Tuthill brand to the greater Kansas City metro area." commented President, Rick Wiedemann. "The success of our Fill-Rite product line and market share gain have directly resulted in this expansion giving us the ability to create jobs during these challenging times in the U.S."

"This is just the beginning of our global commercial strategy that strongly positions our products and services within our key foundational markets," said Steven Westfall, Chief Executive Officer.

About Tuthill Corporation

Tuthill Corporation is a privately held manufacturer of industrial goods specializing in rotating equipment. Founded in 1892, James B. Tuthill originally manufactured common brick to Chicago construction companies. Today, Tuthill manufactures fuel and chemical transfer pumps and meters at Tuthill Fort Wayne; vacuum pumps and positive displacement blowers and systems at Tuthill Springfield; lubrication, magnetically coupled and process pumps at Tuthill Alsip; and custom injection-molded plastics at Tuthill Clearwater. Tuthill serves markets including agriculture, construction, chemical, food and beverage, energy, pharmaceuticals and medical, and transportation.
